BONE CEMENT WITH ANTIBIOTICS AND WITHOUT ANTIBIOTICS

Bone Cement is one of the most frequently used in orthopedics and traumatology field. Common uses include total joint prostheses, as well as joint and bone reconstructions, fracture detection, and treatment of osteoporosis-related vertebral fractures. Bone cements have two types of viscosity as normal and standard.

Our products biggest difference from the other products on the market is that powder product is ready-to-use in mixing box and together with the mixing blister. So powder and liquid part component can mix easily sterile in the surgery. These products mixing powder and liquid in preparation stage, then come to the working stage and make the final.

BONE CEMENT WITH ANTIBIOTICS

CODE	PRODUCT	QUANTITY
1506/SG	OGM1A 20 Standard Viscosity Bone Cement – With Gentamisin	20 Gr
1503/LG	OGM3A 20 Low Viscosity Bone Cement – With Gentamisin	20 Gr
1711/SG	OGM1A 40 Standard Viscosity Bone Cement – With Gentamisin	40 Gr
1810/LG	OGM3A 40 Low Viscosity Bone Cement – With Gentamisin	40 Gr
1071/SG	OGM1A 60 Standard Viscosity Bone Cement – With Gentamisin	60 Gr
1453/LG	OGM3A 60 Low Viscosity Bone Cement – With Gentamisin	60 Gr

BONE CEMENT WITHOUT ANTIBIOTIC

CODE	PRODUCT	QUANTITY
1012/S	OGM1 20 Standard Viscosity Bone Cement	20 Gr
2809/L	OGM3 20 Low Viscosity Bone Cement	20 Gr
1201/S	OGM1 40 Standard Viscosity Bone Cement	40 Gr
1510/L	OGM3 40 Low Viscosity Bone Cement	40 Gr
1881/S	OGM1 60 Standard Viscosity Bone Cement	60 Gr
1923/L	OGM3 60 Low Viscosity Bone Cement	60 Gr

VERTEBROPLASTY CEMENT

Vertebroplasty cement is widely used in traumatology and spinal fields. It is indicated for the stabilization and strengthening of a fractured, collapsed or compressed vertebral body caused by pathological conditions such as osteoporotic or tumors

CODE	PRODUCT	SIZE (MM)
0308/VTB	OGM Vertebroplasty Cement	(1x12,5 Gr)
2023/VTB	OGM Vertebroplasty Cement	(1x15 Gr)
2071/VTB	OGM Vertebroplasty Cement	(1x20 Gr)
1406/VTB	OGM Vertebroplasty Cement	(1x25 Gr)
